

HW2 DRY

3.2- The error occurred because a variable of type Pirate was created without providing any values — meaning the constructor we built was not called.

In such a case, the default constructor is supposed to run, but we didn't define it in the .h file.

When you create a new constructor without specifying that you still want a default constructor, the default one “disappears.”

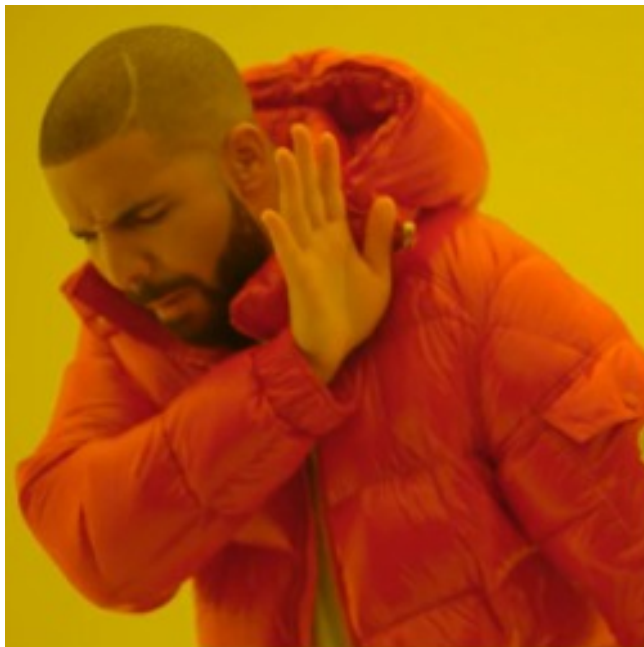

A photo of the program running in terminal:

A terminal window with a black background and green text. The text shows the execution of a program. The first line is a prompt followed by a command. The second line is the output of the command. The third line is the output of the command. The fourth line is the output of the command. The fifth line is a prompt followed by a command.

```
HW2_2020A git:(master) dry  
→ dry git:(master) ./main  
Straw Hat crew contains:  
Luffy (Bounty: 1000000) (Devil Fruit: Gum Gum)  
Zoro (Bounty: 500000) (Devil Fruit: None)  
→ dry git:(master)
```
